

6516206920.txt

Dear Sirs,

I am writing in regards to National Association of Broadcasters petition 04-160. It is my understanding that the NAB is pushing for the regulation of "local" weather and traffic information, does the NAB believe that this should be information for local broadcasting only? If so, will the weather Channel be next? Could it be that i could not plan for a route ahead of schedule by determining on the "local" weather, and traffic condition. This sounds foolish and a little unconstitutional, I urge you to reject the NAB's petition 04-160.

Sincerely,
James Ashley, Jr.
Voter and Taxpayer
